ACKNOWLEDGEMENT

It is a great pleasure for us to acknowledge the assistance and support of many individuals who have been responsible for the successful completion of Full Stack Development mini project work. First, we take this opportunity to express our sincere gratitude to School of Engineering & Technology, Dayananda Sagar University for providing us with a great opportunity to pursue our Bachelor's degree in this institution.

*We would like to thank **Dr. Udaya Kumar Reddy K R, Dean, School of Engineering & Technology, Dayananda Sagar University** for his constant encouragement and expert advice.*

*It is a matter of immense pleasure to express our sincere thanks to **Dr. Shahina Parveen, Department Chairman, Computer Science and Technology, Dayananda Sagar University**, for providing right academic guidance that made our task possible.*

*We would like to thank our guide ...**Dr Santosh Kumar Assistant Professor, Dept. of Computer Science and Technology, Dayananda Sagar University**, for sparing his valuable time to extend help in every step of our project work, which paved the way for smooth progress and fruitful culmination of the project.*

We are also grateful to our family and friends who provided us with every requirement throughout the course.

We would like to thank one and all who directly or indirectly helped us in the mini Project work.

Abstract

ABSTRACT

The “DSU website with Online Registration System” is a full-stack web application designed to streamline campus information access and student registration processes. The aim of the project is to build a modern, responsive, and user-friendly platform where students can explore campus details and register for courses or events through an online form. The system addresses the need for digitalization in universities and reduces manual paperwork by storing all student information in a secure database.

The project uses HTML, CSS, and JavaScript for the frontend to create an intuitive interface, while Node.js and Express.js handle backend server operations. MongoDB is used as the database to store user submissions efficiently. The project focuses on implementing smooth navigation, real-time data validation, and seamless communication between the client and server. Overall, this system demonstrates the application of full-stack development concepts and provides a scalable solution for managing college-level information and registrations.

Mini Project Report- Document Format

The students must follow the following standards & formats for SRS submission.

Report Cover:	Spiral bound
Margins:	Top: 2.54, Bottom: 2.54, Left: 3.81, Right: 2.54, Gutter: 0
Orientation:	Portrait
All fronts:	Times New Roman
Chapter No.:	Font size 18 Sentence case + Bold
Chapter TITLE:	Font size 18 Capital case + Bold
FIRST LEVEL OF HEADING:	Font size 16 Capital case + Bold
Second Level of Heading:	Font size 14 Sentence case + Bold
<i>Third Level of Heading:</i>	Font size 12 Sentence case + Italic (Without bold)
Table Caption:	Font size 12 Sentence case + Bold (at the top of the Table)
Fig. Caption:	Font size 12 Sentence case + Bold (at the bottom of the Fig.)
Body Text:	Font size 12 Normal
Page No.	: Bottom, Right Align, Front pages numbered as i, ii, iii etc. Chapter pages and references numbered as 1, 2, 3 etc.
Line Spacing:	1.5 lines
Printing:	One side of the page

CHAPTER 1 INTRODUCTION

1.1. CHAPTER 1: INTRODUCTION

- 1.2. The DSU website with Online Registration System is a web-based full-stack application developed to digitalize and enhance the campus user experience. It serves as an informational website for students, parents, and visitors by providing essential details about the institution, such as courses, departments, facilities, events, and contact information.
- 1.3. The central feature of the project is the *online student registration system*, which allows users to submit their details through a form. The backend processes and stores these details securely in MongoDB. This eliminates the need for manual entry, minimizes errors, and makes data retrieval easier for administrators.
- 1.4. Through this project, we learned the complete workflow of full-stack development, including frontend design, backend logic, and database connectivity. The system demonstrates how modern web technologies can be integrated to create functional, scalable, and visually appealing applications.

This project report shall be presented in several chapters, starting with Introduction and ending with Summary and Conclusions. Each of the other chapters will have a precise title reflecting the contents of the chapter. A chapter can be subdivided into sections, subsections, and sub subsection so as to present the content discretely and with due emphasis.

CHAPTER 2 OVERVIEW OF PROJECT

Purpose and Goals:

TO BUILD A DIGITAL PLATFORM THAT PROVIDES CAMPUS INFORMATION AND ENABLES STUDENTS TO REGISTER ONLINE USING AN INTERACTIVE WEB INTERFACE.

- * TO DESIGN A CLEAN, RESPONSIVE, AND USER-FRIENDLY COLLEGE WEBSITE.
- * TO IMPLEMENT A BACKEND SYSTEM THAT RECEIVES AND VALIDATES FORM DATA.
- * TO INTEGRATE MONGODB FOR EFFICIENT AND SECURE DATA STORAGE.

2.2. TECHNOLOGIES USED

Frontend:

HTML5: Structure and layout

CSS3:* Styling and responsive design

JavaScript: Client-side behaviour and validation

Backend:

Node.js:Runtime environment

Express.js: Server framework for handling routes and APIs

Database:

MongoDB: NoSQL database for storing registration details

Tools & Others:

- * Git & GitHub
- * VS Code
- * Browser DevTools
- * Postman (optional testing tool)

CHAPTER 3 FUNCTIONAL REQUIREMENTS

CHAPTER 3: FUNCTIONAL REQUIREMENTS*

3.1 User Requirements

- * Users should be able to view college details easily.
- * Users should be able to fill and submit the registration form.
- * Form fields must be validated before submission.

3.2 System Requirements

- * The server must accept POST requests from the form.
- * The system must store submitted user data in MongoDB.
- * The website should be responsive across devices.

3.3 Performance Requirements*

- * Fast loading pages
- * Secure communication between client and server
- * Efficient database operations

CHAPTER 4 CODE SNIPPETS

CODE SNIPPETS

To connect Login form with Database

code snippets

```
const express = require('express');
const mongoose = require('mongoose');
const bodyParser = require('body-parser');
const cors = require('cors');

const Registration = require('./Registration');

const app = express();
app.use(cors());
app.use(bodyParser.json());
app.use(express.urlencoded({ extended: true }));
mongoose.connect("mongodb://localhost:27017/dsu_admissions")
  .then(() => console.log("MongoDB Connected"))
  .catch(err => console.log("MongoDB Error:", err));
app.post('/register', async (req, res) => {
  try {
    const newRegistration = new Registration(req.body);
    await newRegistration.save();
    res.json({ success: true, message: "Registration saved!" });
  } catch (error) {
    res.status(500).json({ success: false, error: error.message });
  }
});
app.listen(5000, () => {
  console.log("Server running on http://localhost:5000");
});
const mongoose = require('mongoose');

const RegistrationSchema = new mongoose.Schema({
  name: { type: String, required: true },
  email: { type: String, required: true },
  state: { type: String, required: true },
  city: { type: String, required: true },
  phone: { type: String, required: true },
  campus: { type: String, required: true },
  program: { type: String, required: true },
  createdAt: { type: Date, default: Date.now }
});

module.exports = mongoose.model('Registration', RegistrationSchema);
```

VISION, MISSION AND VALUES

THROWING LIGHT ON THE WAY FORWARD

**VISION**

To be a centre of excellence in education, research & training, innovation & entrepreneurship and to produce citizens with exceptional leadership qualities to serve national and global needs.

**MISSION**

To achieve our objectives in an environment that enhances creativity, innovation and scholarly pursuits while adhering to our vision.

VALUES

About Dayananda Sagar University

WELCOME TO DAYANANDA SAGAR UNIVERSITY

[ABOUT DSU](#)

[VISION & MISSION](#)

[HISTORY](#)

[NIRF](#)

Dayananda Sagar Institutions founded in the 60s by one such visionary, late Sri Dayananda Sagar committed to take knowledge to the people, transforms today's students into responsible citizens and professional leaders of tomorrow. Dayananda Sagar University created by an Act of the Karnataka State in 2014, built on this adorable legacy and inspired by its own milestones, meeting the needs of quality higher education in this part of the world.

UNVEILING A LEGACY

Universities of great legacy across the world are the invaluable contribution of certain visionaries to the world. Universities don't manufacture products with specific use and determined life cycle. They share & impart multitudes of streams of knowledge and create wonderful human beings – learned practitioners & Disseminators of knowledge to make the world a better place to be. These Universities of great significance have lived through the centuries building centers of knowledge and great alumni of such Universities.

PROUD TO BE PART OF DSU

DSU is a proud member of the Dayananda Sagar Institutions family. Founded by Late Sri Dayananda Sagar in the early sixties (with just four students), DSI has morphed into global education power house, spread over five campuses, catering to the education needs of over 17,000 students. Operating under the aegis of the Mahatma Gandhi Vidya Peetha Trust in Bengaluru, DSI has enabled the transformation of tens of thousands of young Indian and international citizens into professionals in diverse specializations.

BEST-IN-CLASS FACILITIES

INSPIRED BY INNOVATORS

CONCLUSION

The Smart Campus Portal with Online Registration System successfully achieves its objective of digitalizing campus information access and student registration. By combining frontend design with backend processing and database management, the project demonstrates real-world full-stack development skills. The system is efficient, user-friendly, and can be expanded with features like admin login, event registration, notifications, and dashboards in the future. This project helped us understand the complete development cycle and strengthened our technical knowledge in modern web technologies.
